ABOUT

I am passionate about developing. I love technology and scientific innovation. I have taken care throughout my career to share and transmit my know-how and my knowledge.
I am always rigorous and methodical in my work, I will be an asset for your architectural or DevOps projects (Java, JEE, NodeJS ...)

CERTIFICATES

Cloud Architect — Google cloud

Administrator Associate — Microsoft Azure

Cloud Security Engineer — Google cloud

WORK EXPERIENCE

La**
****
July 2017 – present

Software architect

Providing HA architecture for identity management service. This solution is based on Keycloak (creation of extensions), JBoss EAP 7 cluster and OpenID Connect (JWT).
Developing tokenization service (Quarkus, Microservice, JCA/JCE, cryptography, PKCS11 with Bull HSM).
Developing Public Key Infrastructure oriented developer friendly (JAX-RS, cryptography).
Study about performance and productivity with Java containers (Quarkus, GraalVM, micro distribution, ...) .
Study about API gateway (Kong EE) integration.
Expertise about authentication, encryption and coding.

Authentication / OIDC / Keycloak	API Gateway / Kong
Java / JEE / Quarkus	Cryptography / HSM

La**
****
July 2017 – present

Cross products department manager

Roadmap definition and priorization
Team leading
Agile software development (SCRUM, Kanban)
Proximity management

management / leadership	roadmap / costing

La**
****
October 2015 – July 2017

EDUCATION

2001 – 2003 — Ecole nationale supérieure de l'Electronique et de ses Applications
Master's degree
Études généralistes

2002 – 2004 — Universitat Politècnica de València (UPV)
Master's degree
Ingeniero en telecomunicaciones

AWARDS

2021 — Certified Ethical Hacker (CEH) - Prep Course
aCloud Guru online training

LANGUAGES

Français	Langue maternelle
Español	Bilingüe
English	Full professional proficiency

DevOps architect

Tooling and automation architect.
JBoss EAP expert (Wildfly JEE application server): automation, standardization, vault and modules management.
Docker (implementation for Docker swarm and development of L4 proxy)
.
CI/CD process (Jenkins, Sonar, Gitlab, ...)

docker / kubernetes

JEE / wildfly

CI / jenkins

La**
June 2014 – November 2015

****

Web architect

Legacy architecture migration to modular architecture (commonjs, browserify ...)
Implementation of a software factory for Javascript projects based on NodeJS, GruntJS ...
Implementation of quality process and tooling (git flow, test coverage, web component gallery ...)

NodeJS / javascript

La**
October 2013 – May 2014

****

Software engineer

Full stack software engineer:
Automation
JEE backend
Front development

java / JEE

ExtJS

Se**
June 2008 – September 2013

****

Software engineer

Software engineer for Transport Management System.
Middleware development in Java SE to provide a polyglot interface between Sage and Fleet management software (Transics, Tomtom, ...)
Development of Saas product (Progress software and Abobe Flex)

java / JEE
